

The mission of the International Center for Tropical Agriculture (CIAT, its Spanish acronym) is to reduce hunger and poverty in the tropics through collaborative research that improves agricultural productivity and natural resource management.

CIAT is one of 16 international agricultural research centers, known as the Future Harvest centers, supported by the Consultative Group on International Agricultural Research (CGIAR).

The Center's work is financed by a great number of countries, international and regional development organizations, and private foundations. In 2001, donor countries include Australia, Belgium, Brazil, Canada, Colombia, Denmark, France, Germany, Italy, Japan, Mexico, the Netherlands, New Zealand, Norway, Peru, South Africa, Spain, Sweden, Switzerland, Thailand, the United Kingdom, and the United States of America. Donor organizations include the Asian Development Bank (ADB), the European Union (EU), the Ford Foundation, the Inter-American Development Bank (IDB), the International Development Research Centre (IDRC), the International Fund for Agricultural Development (IFAD), the Kellogg Foundation, the Nippon Foundation, the Rockefeller Foundation, the Wallace Foundation, and the World Bank.

Information and conclusions reported in this document do not necessarily reflect the position of any donor agency.

CIAT encourages wide dissemination of its printed and electronic publications for maximum public benefit. Thus, in most cases colleagues working in research and development should feel free to use CIAT materials for noncommercial purposes. However, the Center prohibits modification of these materials without written consent, and we expect to receive due credit when they are reproduced in other publications. Though CIAT prepares its publications with considerable care, the Center does not guarantee their accuracy and completeness.

Contents

	Page
Foreword	vii
Preface	ix
Chapter	
1 Soil macrofauna: an available but little-known natural resource <i>J. J. Jiménez, T. Decaëns, R. J. Thomas, and P. Lavelle</i>	1
PART I	
Impact of Agroecosystems on Soil Macroinvertebrate Communities	
2 Impact of land management on soil macrofauna in the Eastern Plains of Colombia <i>T. Decaëns, P. Lavelle, J. J. Jiménez, G. Escobar, G. Rippstein, J. Schneidmadr, J. I. Sanz, P. Hoyos, and R. J. Thomas</i>	19
3 Quantifying soil macrofauna in a Colombian watershed <i>A. Feijoo, E. B. Knapp, P. Lavelle, and A. G. Moreno</i>	42
PART II	
Life History and Biology of Earthworms	
4 Earthworm communities in native savannas and man-made pastures of the Eastern Plains of Colombia <i>J. J. Jiménez, A. G. Moreno, T. Decaëns, P. Lavelle, M. J. Fisher, and R. J. Thomas</i>	51
5 Population dynamics and adaptive strategies of <i>Martiodrilus carimaguensis</i> (Oligochaeta, Glossoscolecidae), a native species from the well-drained savannas of Colombia <i>J. J. Jiménez, A. G. Moreno, P. Lavelle, and T. Decaëns</i>	69
6 Reproductive strategies of three native earthworm species from the savannas of Carimagua (Colombia) <i>J. J. Jiménez, A. G. Moreno, and P. Lavelle</i>	79
7 Vertical distribution of earthworms in grassland soils of the Colombian “Llanos” <i>J. J. Jiménez and T. Decaëns</i>	87

Chapter	Page
8 Spatial distribution of earthworms in acid-soil savannas of the Eastern Plains of Colombia <i>J. J. Jiménez, J.-P. Rossi, and P. Lavelle</i>	104
9 Differences in the timing of diapause and patterns of aestivation in tropical earthworms <i>J. J. Jiménez, G. G. Brown, T. Decaëns, A. Feijoo, and P. Lavelle</i>	121
10 Diet of an anecic earthworm from the Colombian savannas: a question about ecological categories <i>L. Mariani, N. Bernier, J. J. Jiménez, and T. Decaëns</i>	137

PART III

At the Biogenic Structure Scale: Effects of Ecosystem Engineers on Soil Physical Properties

11 Properties of the structures created by ecosystem engineers on the soil surface in a Colombian savanna <i>T. Decaëns, J. H. Galvis, and E. Amézquita</i>	151
12 Degradation dynamics of surface earthworm casts in grasslands of the Eastern Plains of Colombia <i>T. Decaëns</i>	176

PART IV

At the Biogenic Structure Scale: Effects of Ecosystem Engineers on Soil Organic Matter and Nutrient Cycling

13 Nitrogen dynamics associated with earthworm casts of <i>Martiodrilus carimaguensis</i> Jiménez and Moreno in a Colombian savanna Oxisol <i>A. F. Rangel, R. J. Thomas, J. J. Jiménez, and T. Decaëns</i>	195
14 Phosphorus availability in casts of an anecic savanna earthworm in a Colombian Oxisol <i>J. J. Jiménez, A. Cepeda, D. K. Friesen, T. Decaëns, and A. Oberson</i>	199
15 Soil organic matter within earthworm casts of an anecic-endogeic tropical pasture community, Colombia <i>G. Guggenberger, R. J. Thomas, and W. Zech</i>	212
16 Carbon and nitrogen dynamics in ageing earthworm casts in grasslands of the Eastern Plains of Colombia <i>T. Decaëns, A. F. Rangel, N. Asakawa, and R. J. Thomas</i>	227
17 Ion exchange properties of casts of the anecic earthworm (<i>Martiodrilus carimaguensis</i> Jiménez and Moreno) in a Colombian savanna Oxisol <i>A. F. Rangel, E. Madero, R. J. Thomas, D. K. Friesen, and T. Decaëns</i>	244

PART V**At the Biogenic Structure Scale:
Effects of Ecosystem Engineers on Soil Biodiversity**

Chapter

- | | | |
|----|---|-----|
| 18 | Soil surface macrofaunal communities associated with earthworm casts in grasslands of the Eastern Plains of Colombia
<i>T. Decaëns, L. Mariani, and P. Lavelle</i> | 255 |
| 19 | Earthworm effects on permanent soil seed banks in Colombian grasslands
<i>T. Decaëns, L. Mariani, N. Betancourt, and J. J. Jiménez</i> | 274 |

PART VI**Effects of Ecosystem Engineers from the Scale of the
Sampling Unit to the Experimental Plot**

- | | | |
|----|--|-----|
| 20 | Assessing the organic phosphorus status of an Oxisol under tropical pastures following native savanna, using ³¹ P NMR spectroscopy
<i>G. Guggenberger, L. Haumaier, R. J. Thomas, and W. Zech</i> | 299 |
| 21 | Lignin and carbohydrate alteration in particle-size separates of an Oxisol under tropical pastures following native savanna
<i>G. Guggenberger, W. Zech, and R. J. Thomas</i> | 312 |
| 22 | Effect of exclusion of the anecic earthworm <i>Martiodrilus carimaguensis</i> Jiménez and Moreno on soil properties and plant growth in grasslands of the Eastern Plains of Colombia
<i>T. Decaëns, J. J. Jiménez, and P. Lavelle</i> | 329 |
| 23 | Spatio-temporal structure of an earthworm community and soil heterogeneity in a tropical pasture (Carimagua, Colombia)
<i>T. Decaëns and J.-P. Rossi</i> | 338 |

PART VII**General Conclusions and Future Research Priorities**

- | | | |
|----|---|-----|
| 24 | General conclusions, highlights, and future needs
<i>J. J. Jiménez, T. Decaëns, R. J. Thomas, L. Mariani, and P. Lavelle</i> | 361 |
|----|---|-----|
