

APPENDIX 2: List of papers, SESSION 2 D

Wednesday, 29 August 2001, 16:00 to 18:00 h

Organized by R. Roetter, Alterra, Wageningen UR, The Netherlands

Titles and sequence of ORAL PRESENTATIONS:

No. 1 ---- J Dimes, Zondai Shamudzarira : Simulation modelling and participatory research: Closing the gap between research and **management** in smallholder farming systems

No 2 ---- J Stoorvogel, J Antle / et al.: The trade-off model : a new tool to support INRM **policy decision** making

No. 3 ---- AG Laborte et al.: Harnessing the power of IT in SysNet: lessons learned from developing an integrated web-based system for interactive **land use scenario analysis**

No. 4 ---- R. Quiroz et al.: **Modeling interface** through computer-generated three-dimensional virtual environments : a prototype

No. 5 --- F. Bousquet, SP Kam et al.: The use of **multi-agent simulations** in companionable modelling approach for agro-ecosystem management

Titles of other selected abstracts

No 6-- Du Toit et al. : Use of weather analogue model to **manage** seasonal variability (FP) (SD)*

No 7 – G Leclerc et al.: The intelligent team decision assistant (ITDEA): a **discussion support** system for the information age. (PP, SD)*

No 8 – N Beaulieu et al.: Supporting **local planning** efforts through monitoring of environmental dynamics: the contribution of remote sensing images (PP)

No 9 – J.A Beltran & Zeledon.: The participatory mapping , analysis and **monitoring** of natural resources at the micro-watershed level (?)

No 10 – T S Bontkes et al.: Problems and opportunities in adopting system tools for decision-making related to **soil fertility improvement** in Africa (FP)

* *FP = full paper available; PP = poster presentation; SD = software demonstration*

NOTE: A maximum of 15 minutes was allocated for each of the oral presentations . The remaining hour was reserved for questions, summary of other papers and general discussion.
