

## TABLE OF CONTENTS

### **EXECUTIVE SUMMARY** (65 kb)

<b>OUTPUT 1. ENHANCING GENE POOLS</b> (730 kb)	1
<b>1A. Rice Improvement using Conventional Breeding and Gene Pools and Populations with Recessive Male-Sterile Genes</b>	1
• Aerobic Rice Composite Population Breeding Leads to the Selection of Promising Lines for the Colombian Savannas Ecosystem	1
• Aerobic Rice Yield Trials in the Colombian Altillanura Savannas and the Research Center La Libertad. CIAT-CORPOICA, 2002	8
<b>1B. Broadening the Genetic Base of Irrigated Rice in Latin America</b>	12
• Utilization of New Alleles from Wild Rice Species to Improve Cultivated Rice in Latin America	12
<b>1C. The use of Anther Culture and In Vitro Culture for Enhancement of Gene Pools</b>	18
• The use of Anther Culture and Embryo Rescue for Enhancement of Gene Pools	18
• Embryo Rescue from Inter-Specific Hybrids	19
• Doubled Haploids Lines Aiding Gene Mapping	19
• Anther Culture for Advancing Breeding Populations of FLAR	20
• Temporary Immersion System (RITA) for Anther Culture of Rice	21
• Molecular Characterization of Rice and Red Rice using Microsatellites and its Relation with the Morphological Seed Traits	27
• Assessment of Combinatory Ability between Red Rice and Rice under Greenhouse Conditions	34
• Assessment of Gene Flow from Transgenic and Non-Transgenic Rice into Red Rice under Experimental Field Conditions	38
• Use of Red Rice as Potential Trait Source for Commercial Rice Breeding	43
<b>1D. Functional Genomics</b>	48
• Phenotypic Characterization and Seed Multiplication of a Collection of Rice T-DNA Insertional Mutants	48
• International Rice Functional Genomic Consortium	57
<b>1E. Preliminary Evaluation of the Response to <i>Hydrellia</i> spp. on the Main Commercial Rice Varieties Planted in Peru's Coastal Region</b>	60
• Preliminary Evaluation of the Response to <i>Hydrellia</i> spp. on the Main Commercial Rice Varieties Planted in Peru's Coastal Region	60
• Economic Threshold for Controlling the Whorl Maggot ( <i>Hydrellia</i> spp.) on Peru's Northern Coast: Preliminary Results	63

<b>OUTPUT 2. CHARACTERIZING RICE PESTS AND THE GENETICS OF RESISTANCE</b> (336 kb)	66
<b>2A. Rice Blast, Sheath Blight and Rice Stripe Necrosis Virus</b>	66
• Characterization on Blast Pathogen Populations. Monitoring the Evolution in the Genetic and Virulence Diversity of the Blast Pathogen Over Time	66
• Selection of Rice Blast Resistance Sources to Different Genetic Lineages of the Blast Pathogen. Development of a Blast Nursery with Potential Sources of Resistance	70
• Identification of Molecular Markers Associated with the Blast Resistance Genes Pi-1, Pi-2, Pi-33 and their Incorporation into Commercial Rice Varieties through Backcrossing and Marker Assisted Selection (MAS)	73
• Identification of Molecular Markers Associated with the Durable Blast Resistance Genes in the Commercial Rice Cultivar Oryzica Llanos 5	76
• Evaluation of Breeding Populations Incorporating Complementary Resistance Sources to Blast. Association of Selection for Blast Resistance in Early Generations and Stability of the Resistance	78
• Characterization of the Genetic Structure of Rice Blast Populations from Peru	91
• Introgression of RSNV Resistance from the Wild Species <i>Oryza glaberrima</i> into the Cultivated <i>Oryza sativa</i> . Studies on the Interaction of <i>Polymyxa graminis</i> on Rice	95
• Identification of Resistant Lines to <i>Rhizoctonia solani</i> (Sheath Blight) and Development of an Evaluating Methodology	98
<b>2B. Characterization of the Complex of Rice Hoja Blanca Virus and <i>Tagosodes orizicolus</i></b>	104
• Characterizing the Interactions of Host Plant Rice Hoja Blanca Virus and <i>R. orizicolus</i> Complex	104
• Interactions between <i>T. orizicolus</i> and RHBV	108
• The Studies to Determine the Genetics of Resistance to RHBV and <i>R. orizicolus</i>	108
• Testing to Determine if there are Biotypes of <i>Tagosodes orizicolus</i> in Different Rice Growing Regions of Colombia	109
• Losses Due to Different Level of Infestation of <i>Tagosodes orizicolus</i> and RHBV on Selected Rice Varieties	110
• Integrated Pest Management is an Information Intensive Activity	111
<b>2C. Foreign Genes as Novel Sources of Resistance to Rice Hoja Blanca Virus and <i>Rhizoctonia solani</i></b>	115
• RHBV (Rice Hoja Blanca Virus) Resistance mediated by RNA-Cross Protection in Transgenic Rice	115
• Foreign Genes as Novel Sources of Resistance for Fungal Resistance	121

<b>OUTPUT 3. ENHANCING REGIONAL RICE RESEARCH CAPACITIES AND PRIORITIZING NEEDS WITH EMPHASIS ON THE SMALL FARMERS</b> (644 kb)	130
<b>3A. Rice and Sorghum Participatory Plant Breeding in Central America</b>	130
• Rice and Sorghum Participatory Plant Breeding in Central America	130
<b>3B. Education and Rice Cultivation as a Vehicle to Alleviate Poverty. Measurable Indicator: New Varieties and Germplasm</b>	159
• Brazil – Launches a New Variety Adapted to Upland and Lowland Rice Ecosystems	159
• Colombia – Launches the “Línea 30” as a New Commercial Variety for the Upland Savannas Ecosystem	160
• Bolivia – Launches Two New Upland Rice Varieties from Conventional Crossbreeding and Composite Population Breeding. CIRAD Upland Variety for the Small-Farmers Rice Ecosystem	163
• First Upland Rice Variety from Composite Population Breeding	163
• Chile – Develops a New Rice Site-Specific Composite Population with Cold Tolerance for the Temperate Climate Lowland Ecosystem	167
• International Upland Rice Breeding Seminar-Workshop for Latin America and the Caribbean (LAC). Villavicencio, Meta-Colombia, August, 19-22, 2003	168
<b>3C. Impact of CIAT Upland Rice Varieties on Resource-Poor Farms in the Peruvian Amazon</b>	177
• Impact of CIAT Upland Rice Varieties on Resource-Poor Farms in the Peruvian Amazon	177
<b>3D. Collaborators, Training and Information</b>	199
• Collaborators	199
• Training	203
Thesis	203
Workshops	204
Formation and Training	205
• Information	207
Refereed Publications	207
Book Chapters	208
Proceedings	209
Other Publications	210
IP-4 Web Site	211
<b>Annex 1. Principal and Support Staff</b>	212
• <b>Principal Staff</b>	212
• <b>Support Staff</b>	212
Associates and Assistants	212
Visiting Scientists	212
Secretaries	212
Technicians and Field Support	213
<b>Annex 2. Donors</b>	214
